

WELCOME HOME

Midtown Central incorporates a modern monochromatic palette applied across layered details to achieve an elegant and timeless quality on the exterior façade. Beautifully applied layered architectural elements include glass guardrails at balconies to visually dissolve the separation between the inside and outdoors to create a sense of fluidity. The unique lightweight aluminum frames surround the balconies, and the extensive windows frame the view to enhance your everyday life and add visual interest from the street-level. The spacious balconies and roof decks extend living space to the outdoors as a relaxation or entertainment space. The contemporary 4-storey building is designed by Studio B Architects, an architecture firm based in Vancouver.
